

GARMENT SIZING MODEL

We wish to emphasize that these size measurements are approximate, and are to be used as an accurate guideline only for a “regular garment fit, for the purpose intended”.

It is not recommended to specify any garment size smaller than the actual measurement may suggest in our below chart, whilst it is recommended to please specify the next size bigger, rather than smaller, where any such measurement may fall between two suggested sizes.

Wearers preferring a more generous fit, please need to specify a garment size, of at least one size, or possibly even, two sizes bigger, than these measurements depicted.

NB! Please choose your size accurately as we cannot change / swap / exchange shirts once the order has been placed.

WOMEN

Herewith are our standard Women’s measurements for your reference:

S	-	Bust: 32”/82 cm	-	Hips: 36”/92 cm
