

Dear Club President,

Custom Cars and Coffee is a non-profit organisation founded in 2014, with a group of likeminded automotive enthusiasts. Holding several events throughout the year, we bring together numerous car clubs representing different makes of cars (including unique cars that are otherwise rarely seen). We are a family orientated group and are involved in raising funds for many charities with the running of our events.

Accordingly, we would like to formally invite your club to our forthcoming event held in conjunction with **ELTHAM College and Research CFA**. This event will be held on **Sunday 15 October 2017** at ELTHAM College from **10.00am – 1.00pm**, with all proceeds being donated to Research CFA to assist in the purchasing of a Thermal Imaging Camera (TIC).

Thermal Imaging Cameras (TIC) have become an integral tool for fire brigades. It detects long-wave infrared radiation (more commonly known as heat), the TIC will assist the CFA in search and rescue (including locating casualties in zero-visibility environments), initial assessment of fire activity, locating hazardous materials and safer navigation of smoke-filled buildings to name a few. A TIC is a hand-held, battery-powered device which has a display screen that firefighters can view and costs close to **\$12,000**.

We believe this event will be an exceptional opportunity to present your club to other motoring enthusiasts whilst participating in a worthy cause.

Please let me know by the 17th September 2017 if you would like to accept the invitation and confirm how many car spaces you would like for your display. Please do not hesitate to contact me for any queries.

Kind regards,

Brandon Chan

President of Custom Cars & Coffee
