

BATHURST - RESULTS

2). What if Bathurst was a PCV Regularity Event (based on Averaged FoSC Factors)?

DISCLAIMERS - Firstly, the following Results are for interest only and do not represent any official view of the FoSC (Festival of Sporting Cars) Regularity Relay held at Bathurst on Sunday 4th April through Tuesday 6th April 2010! Secondly, a "best guess" of the PCV Class for each of the PCV Driver / Cars at Bathurst has been applied. Such best guess is based on comparison to PCV Sprint Events going back a few years to dredge up (hopefully) the correct PCV Classes. Thirdly, the recorded "Factors" published by NatSoft, have been "averaged" based on the number of sessions completed (also excluding "0" Factors). As you may recall, FoSC determined your target lap time and then applied a Factor for tenths of a second close to your target lap time and a penalty Factor for tenths under your target lap time.

FOSC - Car Clubs of Australia Regularity Festival MT PANORAMA, BATHURST
